

OCFA Planning & Development Services *Project Pre-Submittal Meetings*

Do you have a large or complicated project or simply want to understand how to go about developing in OCFA's jurisdiction? Consider scheduling a project pre-submittal meeting. Your contractors and subcontractors are welcome to attend the meeting with you and have their questions answered, too.

During the meeting, the OCFA representatives will assist with the following:

- Address local and national standards and building and fire codes as it relates to the specific project.
- Provide applicable OCFA information bulletins and/or guidelines that will assist in understanding code application for projects within the OCFA' s jurisdiction.
- Explain plan submittal and inspection processes and requirements for each of our 23 jurisdictions.
- Discuss applicable fees and turnaround times.

The OCFA goal is to streamline the plan review and inspection process so that your project can stay on schedule with as few delays as possible.

Please call 714.573.6108 to request a pre-submittal meeting or for more information.
