Plant separation, both horizontally and vertically, within 100 feet or to the property line, can help protect your home by reducing the fire’s ability to spread.

**SHRUB SEPARATION**

- Plants that are more than 2 feet in height should be in groups of no more than 3 and need to be separated by 3 times the height of the tallest plant, or 15 feet, whichever is greater.

**TREE SEPARATION**

- Trees should be in groups of no more than 3 and at least 30 feet apart.
Consult a geologist prior to beginning maintenance if you have slope stability questions.

For more information, please visit the OCFA website or call 714-573-6774 to schedule a Wildfire Home Assessment.

SEPARATION FOR CHIMNEYS AND LPG TANKS
- Trees need to be at least 10 feet away from chimneys
- LPG tanks need to be at least 10 feet away from surrounding vegetation
- Shrubs next to homes should not exceed 2 feet in height

ROADSIDE CLEARANCE
- 10 feet of Vegetation Clearance is needed from the edge of the road
- 13 feet 6 inches of Vertical Clearance is needed from the road to the tree canopy
